

NOBODY REPORTS THE MISSES • SIX CASES

Wrong answers get caught. Missed items do not.

KYB	owner two layers up, never on the page
SOX	the sample missed the exceptions
Claims	exclusion or sublimit unflagged
Contracts skipped	renewal or assignment clause
Patents	the decisive reference missing
Voice	a disclosure the agent did not say

Six kinds of work. Six ways to count a miss.

For each: what the miss looks like, who pays, how to count it, who labels. From the essay, 4 October 2026.

Six hypothetical cases, no incident or cost figure. Behind it: one model, 25 questions on public-domain case law.

KYB: the miss is owner two layers up.

FOR THIS WORK

The miss **owner two layers up**

Who pays **the customer**

The count **owner-level recall**

Who labels **a compliance analyst**

Count: owner-level recall.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.

SOX: the sample missed the exceptions.

FOR THIS WORK

The miss	sample missed exceptions
Who pays	the customer, next audit
The count	seeded exception recall
Who labels	an experienced auditor

Count: seeded exception recall.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.

Claims: the miss is exclusion left unflagged.

FOR THIS WORK	
The miss	exclusion left unflagged
Who pays	the client, denied claim
The count	gap recall
Who labels	a senior broker

Count: gap recall.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.

Contracts: the miss is renewal clause missed.

FOR THIS WORK

The miss	renewal clause missed
----------	------------------------------

Who pays	the client, window closed
----------	--------------------------------------

The count	recall per clause type
-----------	-----------------------------------

Who labels	a lawyer, vs playbook
------------	------------------------------

Count: recall per clause type.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.

Patents: the miss is decisive reference missing.

FOR THIS WORK

The miss	decisive reference missing
Who pays	the customer, in opposition
The count	hidden art found or not
Who labels	the record, or a professional

Count: hidden art found or not.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.

Voice: the miss is disclosure skipped.

FOR THIS WORK

The miss	disclosure skipped
Who pays	the customer, per call
The count	disclosure recall per call
Who labels	a compliance reviewer

Count: disclosure recall per call.

What the miss looks like, who pays for it, how I would count it, and who I would trust to label it.

A hypothetical case from the essay, not an incident. Who pays is asserted, not measured.
